28 October 1959

 Dear

50X1

In order that we may meet the contractual requirements for specifying the exact configuration of units shipped under our prime contract subsequent to shipment of unit 9003, it is necessary that we establish the configuration of the unit for which you have acknowledged receipt.

It is our understanding that you signed the Material Inspection and Receiving Report (DD Form 250) for our unit No. 9004 after having reviewed the log books for the instrument and nose cone noted on the DD Form 250, instrument No. 10 and Nose Cone No. 109, respectively; it is further understood that these log books contained all of the necessary pertinent data indicating acceptance tests performed, telemetry specifically included in this unit and modifications made to the instrument or nose cone, all of which might make them different from the instrument and nose cone which were a part of our unit No. 9003.

If you signed the DD Form 250 for unit No. 9004 with the above understanding, will you be kind enough to so stipulate in the space provided in the lower lefthand corner and return the original and one copy to me, forward a copy to  and retain the fourth copy for your files or destroy it as you wish.

50X1
